Product Data Technology

PDT Europe 2013

October 15-16 2013
Stockholm, Sweden

Theme PDT Europe 2013

Integrating PLM, SE and CM for lean, innovative and agile operations

Product Lifecycle Management (PLM), Configuration Management (CM) and Systems Engineering (SE) as high level disciplines have a lot in common. Yet in many organizations the related processes are conducted by different and often separated teams. Leading organizations are now looking into the integration of PLM, SE and CM with the vision to also include the extended enterprise with suppliers, partners and customers.

PDT Europe 2013 will look into state of the art integrated engineering environments in industries such as aerospace and defence, automotive, high tech, energy and building construction. The capabilities of standards such as STEP, PLCS and AP233 will be explored as enablers for change and business benefits will be presented, including lessons learned. Cases will be presented that in many ways challenge the current practice of large scale and monolithic systems to support engineering across a product's lifecycle. The heterogeneous world of engineering must move towards connectivity with the value of product data driving decisions to move to new business processes and business models.

This 'Call for abstracts' invites original contributions concerning any of the following specific or general topics, or other related material.

Conference topics and proposed contributions to PDT Europe 2013

This "Call for abstracts" invites original contributions that in any way builds on what is described above with PLM, CM and SE and integration. Presentation may target any of the following areas or a combination thereof:

- Business & ROI
- Technology & Standards
- Processes & Methodologies

Programme committee

Håkan Kårdén, Eurostep, Sweden

Frederic Feru, Airbus, France

Peter Bilello, CIMdata, USA

Nigel Shaw, Eurostep, UK

Sune Horkeby, Siemens Oil and Gas Division, Sweden

Kent Freeland, Nuclear Energy and Information Technology Consultant, USA

Conference venue

The PDT conference will take place in Stockholm, Sweden, October 15-16, 2013.

We expect a very good event with many interesting presentations, as we have had earlier years.

Key dates

April 15	Call for abstract open
May 15	Abstracts due
June 15	Final programme published
Oct 14	PLCS implementers workshop
Oct 15-16	PDT Main Conference

Abstracts should be sent to:

Eurostep
e-mail: pdtd@eurostep.com

Due-May 15

If you have questions please contact conference management:
